ANO "NATIONAL CONGRESS"

Additional professional education program
for professional retraining of personnel.

Anti-Overton to the technologies of "color revolutions".

**Elimination of internal threats to national security, protection of the statehood, sovereignty
and integrity of the Russian Federation and partner countries.**

Pattern technologies of national teams "Managerial special forces".

Program Director:

Miroslava Strekalovskaya

Scientific adviser:

Vladimir Egorov – *Doctor of Economics, Doctor of Historical Sciences, Professor, Deputy Director
of the "Institute of CIS Countries";*

Sergey Melnikov - *Doctor of Economics, Professor, Candidate of Pedagogical Sciences, Professor
of the Department of Management of the Institute of Business Studies of the Presidential Academy
(RANEPA), Full Member of the Russian Academy of Natural Sciences*

We invite all interested persons to participate in the "Third Congress of the SVO Volunteer Groups" for the purpose of selection for further formation of teams and their training at the "CIS Institute" using a specially prepared methodology for the purpose of forming national teams of professional managers. These teams will then be able to improve their skills by working on the development of the territories of their states, thereby bringing benefit to their states through the applied solution of strategic tasks and the implementation of social projects. After completing the training, the teams will have a set of skills to protect statehood, sovereignty and integrity; the teams will be able to effectively combat internal threats to the national security of their states, which is intended to strengthen the international ties of the Russian Federation with partner countries and ensure the stable development of a fair and secure multipolar world. The activities of regional teams will be aimed at increasing the level of GDP of their countries and establishing foreign economic relations, both between Russia's partner countries and directly with the Russian Federation. Regional teams will be sent to various countries to improve their knowledge and skills, as well as to solve practical problems.

We also invite sponsors to form and sponsor national teams. For sponsors, this is an opportunity to promote their interests in the countries where their team will work, to establish economic, political and cultural ties, to create "centers of influence" in those countries where it is appropriate and potentially profitable.

The program implementation procedure includes:

- Participation (including remote participation) in the "Third Congress of SVO Volunteer Groups" and selection for the formation of regional teams
- Training at the "Institute of CIS Countries"
- Practical application of acquired knowledge and further improvement of qualifications

Potential attractiveness for investors:

- The ability to use regional teams to promote their interests in the territories of those countries where they want to develop their business.
- All sponsors are members of the "League of Entrepreneurs", which is a club of entrepreneurs for closer mutual cooperation both within the Russian Federation and with partner countries.
- The team can generate income for sponsors by solving state strategic tasks, for example, increasing voter loyalty or preventing a coup d'etat, the cost of one such task can be tens of times more than the invested funds.
- The ability to build direct economic cooperation with the right partners without intermediaries.
- The ability to earn money by selling the services of your team to promote certain interests.
- All credit for solving the team's tasks goes to the sponsor.
